

# How Unisys aligns with ServiceNow

## Cloud Management for ServiceNow

Enables large organizations to securely transform and manage their most demanding workloads with ServiceNow embedded capabilities.

## Advisory Consulting and Migration Services

Integrates and modernizes service management and IT operations management (ITOM) environments for clients currently investing in or migrating to the ServiceNow platform.

## Digital Service Desk and Field Services

Empower employees with an all-in-one solution for omnichannel support to work more efficiently with minimal interruption and help identify and deliver the right solutions quickly via the preferred channel.

## Cybersecurity for ServiceNow SecOps

Isolate compromised users and devices quickly before an attack spreads laterally using a Zero Trust security approach directly from the NOW Platform.

## Global Alliance Award

- Elite partner and technology partner
- Development design partner
- Member Global Alliances Partner Advisory Board
- Three service design partner areas
