Public Cloud Assessment Service for ClearPath® MCP Software Series

Product information sheet

Overview

Run your ClearPath® MCP Software Series ecosystems on the cloud, including Microsoft Azure or Amazon Web Services (AWS), with ease. Unisys Public Cloud Assessment Service helps you understand the specific cloud requirements for ClearPath MCP Software Series deployments.

We work with you to design and configure your cloud environment with scalability, optimized computing and data storage in mind. Whether you already have an existing cloud environment or want to adopt the cloud as part of your infrastructure, we can help build an environment compatible with a ClearPath MCP Software Series deployment. ClearPath MCP Software Series supports multiple offerings:

- ClearPath MCP Developer Studio (all versions except Personal Edition)

- ClearPath MCP Bronze, Silver, Gold, Platinum and Titanium

- ClearPath FS Series 1000, 2000 and 3000

Approach

Unisys may perform the following activities as part of this service, according to our mutual agreement:

- Understand your needs and challenges

- Review your current ClearPath MCP infrastructure and applications

- Discuss your IT infrastructure strategy, such as transition to the cloud, virtualization, high availability, disaster recovery and backup recovery

- Discuss any recommended considerations for your existing cloud environment, if applicable, when hosting your MCP Software Series environment

- Assist you in designing and configuring your cloud environment to support MCP Software Series

Deliverables

During this engagement, Unisys will deliver a plan for cloud environment readiness for a ClearPath MCP Software Series deployment and a management summary.

Benefits

The Public Cloud Assessment Service helps you:

- Leverage Unisys' deep expertise to ensure your MCP cloud environment supports your business goals

- Confidently complete your ClearPath MCP Software Series upgrade journey guided by Unisys' analysis and recommendations

Timelines

Unisys will deliver the services according to a mutually agreed-upon schedule and scope.
